discussions @ DSC

Please join us in the Digital Scholarship Commons for a series of informal discussions exploring the role of digital technologies in teaching, learning, and research. All faculty and graduate students are welcome. Bring a lunch—light refreshments will be served.

For more information visit dsc.neu.edu and to attend a discussion please RSVP at DSC@neu.edu.

Co-sponsored by: Academic Technology Services, University Libraries, and the Center for Advancing Teaching and Learning Through Research

Data Visualization
September 24 | 12:00pm-1:00pm
Digital Scholarship Commons

This session will begin with a guest presentation by Professor Isabel Meirelles and will focus on the use of visualization tools across theuniversity. What tools are people using and what are their features, blind spots, and future directions? How are these tools being used in teaching, research, and administration?

Scholarly Communication in the Digital Age
October 29 | 12:00-1:00
Digital Scholarship Commons

In this session we'll focus on new ways of sharing research, including new forms of publication and data-sharing, and new approaches to peer review and assessment of impact. Join us to continue the discussions fromOpen Access Week!

The Life Cycle of Digital Learning Objects
December 3 | 12:00-1:00
Digital Scholarship Commons

In this session we'll be thinking about how learning objects are created,used, and shared. What tools and formats work to extend this lifecycle?How do these objects adapt over time?
