discussions @ DSC

Please join us in the Digital Scholarship Commons for a series of informal discussions exploring the role of digital technologies in teaching, learning, and research. All faculty and graduate students are welcome. Bring a lunch—light refreshments will be served.

For more information visit dsc.neu.edu and to attend a discussion please RSVP at DSC@neu.edu.

Co-sponsored by: Academic Technology Services, Digital Scholarship Group, and the Center for Advancing Teaching and Learning Through Research

---

Open Source Culture
June 25 @ 12:00pm
211 Snell Library

How is the recent cultural emphasis on open source, open access, and open standards affecting our work as teachers, researchers, and scholars? What do these terms mean to us? What challenges and opportunities does the open-source environment offer?

---

Data and Data Representation Methods
July 16 @ 12:00pm
211 Snell Library

How is digital information represented and circulated within our diverse disciplines and special areas of work? How do we understand the concept of “data”? How do our data modeling choices affect scholarship and teaching?

---

Our Evolving Relationship with Technology
July 30 @ 12:00pm
211 Snell Library

How do technological and social change influence the work we do with technology in the academy? How do we position ourselves in relation to changing technologies? What drives change? How do we manage or control change, and when do we resist it?
